

# Transfer from Onename to Browser

## 1. Download & Install Blockstack

Users will need to install the latest version of Blockstack here:

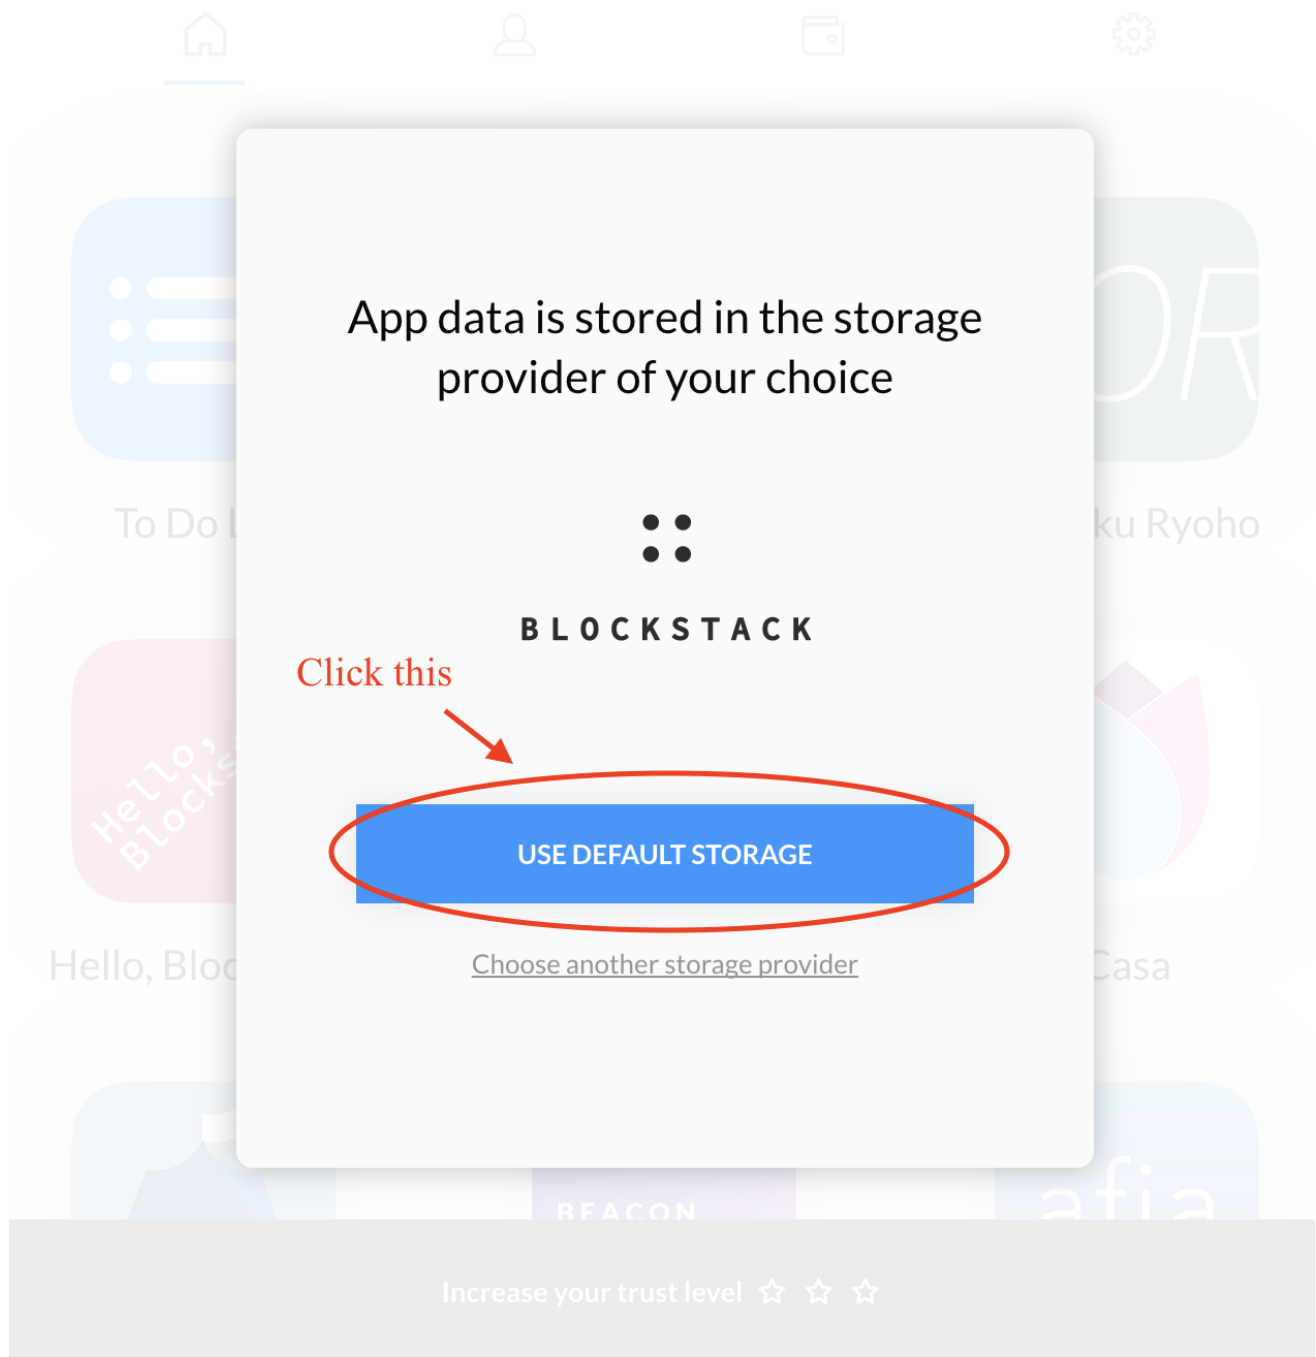

<https://blockstack.org/install>

## 2. Go through Blockstack on-boarding process

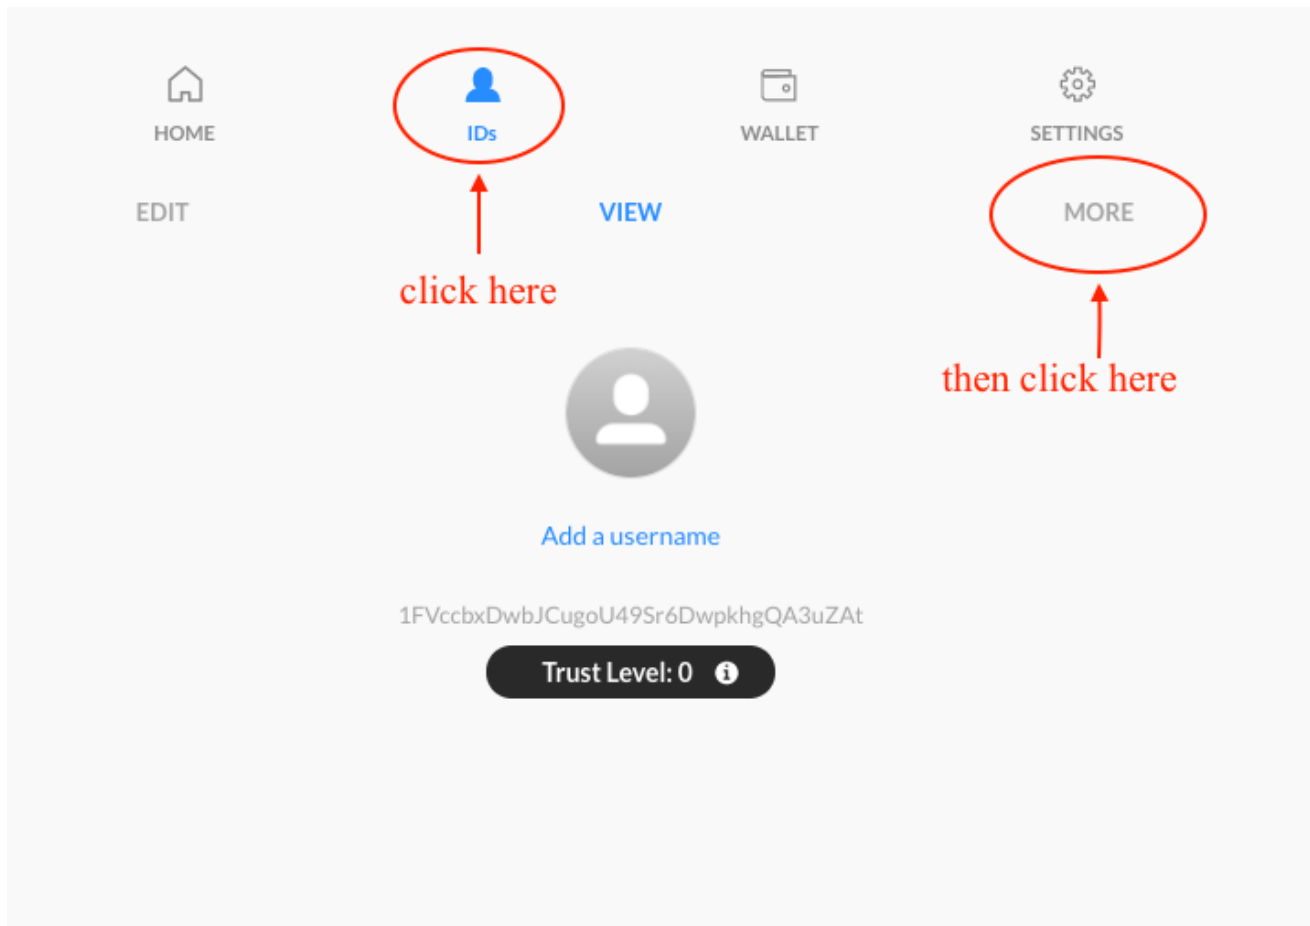

Once you open Blockstack, you will be:

- asked to pick a new password to secure their identity.
- given a new identity key which you should write down and store safely
- asked to provide your email
- asked to select a storage provider. For now you must select the default storage option to transfer from onename (see below screenshot)

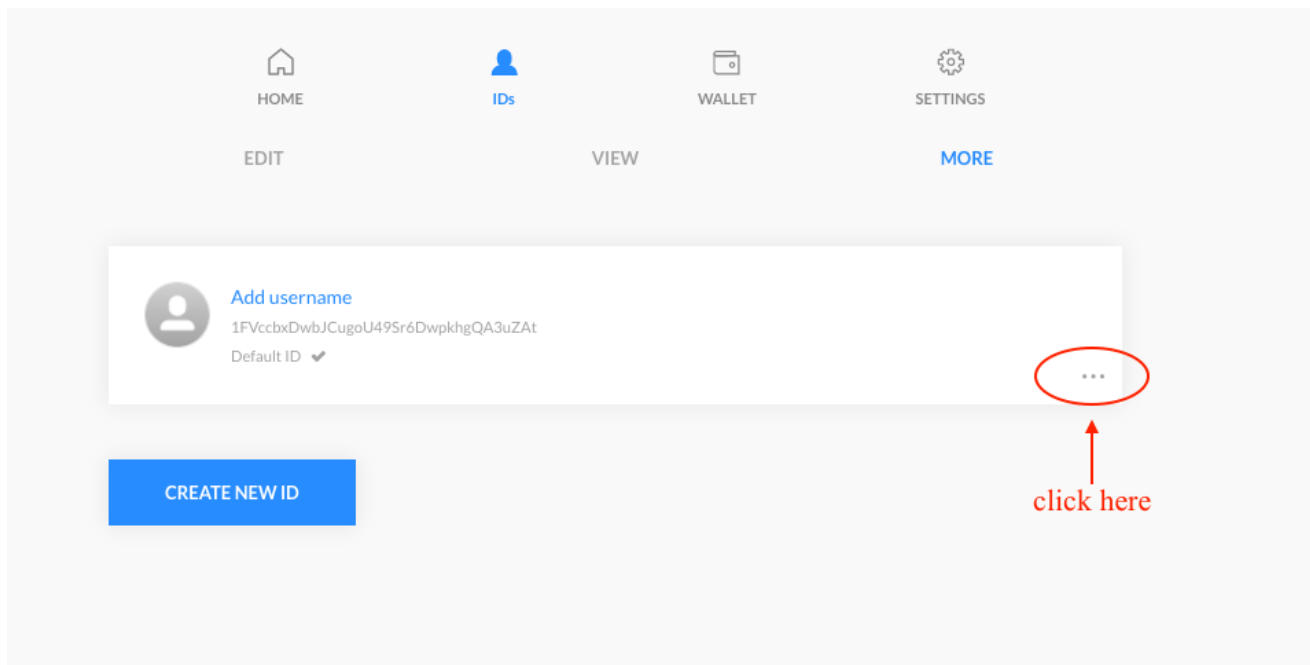

### 3. Begin name transfer process

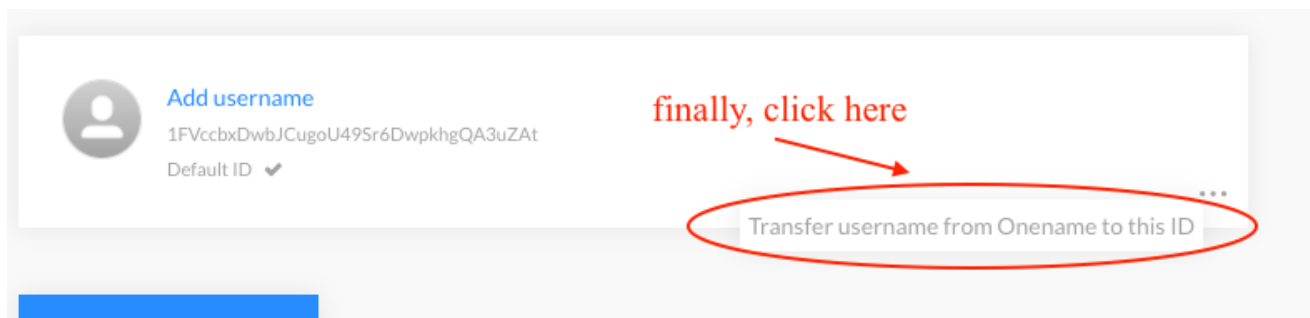

- Click on "IDs"
- Then click "more"

c. Click the three dots in the bottom right corner of the box

d. Then click "transfer username from Onename to this ID"

#### 4. Sign in to Onename

You should sign in to [onename.com](https://onename.com) with your Onename email and password - **not** what you used for the Blockstack Browser.

## 6. Wait for export to be processed

Click "I Understand" and after the export has been processed (can take up to 48 hrs) you can go back to Blockstack and your name will appear on the browser.

**Export username request received!** x

We have received your request to export your username.

This process can take 48 hours or more. You will receive an email when the process is complete.

**I UNDERSTAND**

To check the status of your name transfer, you can check the explorer page for your address to see when the name appears in the list of names owned: <https://explorer.blockstack.org/>
